

Academy Information and Planning Workshop, January 10-11, 2008

Patricia Arneson, Professor of Business Education, and Sue Sydow, Director of Assessment, attended the Academy for Assessment of Student Learning's Information and Planning Workshop held January 10-11, 2008, in Lisle, Illinois.

The Information and Planning Workshop was an event designed for one to three participants to attend from institutions that had been accepted into the 2007-2008 Academy for Assessment of Student Learning. It was designed to create an expertise on the Academy's features and elements. It provided participants with:

- The opportunity to map out goals, a timeline, approach, events, and a plan for the institution across all four years of the Academy.

- An in-depth view of the Academy, how it works, and the optional extras (hot-topic workshops, on-site experiences, publications showcasing Academy institutions, Annual Meeting Showcases, on-site consultation, institutional coaching, etc.).

- Time for one-to-one discussions with Commission staff on Academy plans.
