

Graduating Student Survey

The Graduating Student Survey is administered to all approved graduation candidates and is mailed to candidates approximately mid-semester of their term of completion. It is included with their informational packet regarding the graduation ceremony and procedures. Because the survey is optional, the response rate is typically about 50-60%.

The survey was originally created for institutional assessment purposes and captured essential data such as demographics, evaluation of campus services, and perceptions of individuals' abilities. Recent requirements by the Voluntary System of Accountability (VSA) have expanded the survey to include additional questions relating to the students' future plans.
