

# BUSINESS ADMINISTRATION > SUPPLY CHAIN MANAGEMENT

Raw materials are essential to creating products. Supply chain management is the area of business that manages the flow of these raw goods and the processes that transform them into final products. The Supply Chain Management degree program at Wayne State College integrates elements of logistics with the broad area of the supply chain. Supply chain managers oversee productivity, quality, and efficiency of operations. Their goals include ensuring quality products while also keeping costs down. Supply chain management is also important because it can help reduce the risk of recalls of products while also building a strong brand. With a strong business background and Supply Chain Management degree, you'll be prepared to work in multiple industries and improve business processes. Supply chain professionals develop sustainable solutions to complex problems.

## fast facts

**Credit hours:** 63
